LOCKHEED MARTIN

Dear Lockheed Martin,

It is with great enthusiasm that I submit my application for your Software Developer position. As an involved senior at Chapman University studying Software Engineering, I believe I have gained a strong understanding of the software engineering processes, as well as learning a multitude of topics within software engineering. As you will see from my attached resume, I have recently been an intern for CHOC Children's AIMed MI3 program, where I work alongside medical leaders, to innovate new technology that will change the face of medicine. As an innovative software intern have the role of front end developer, working with Java, Swift, HTML, PHP, JavaScript. This internship has also taught me strong teamwork skills through collaborative development, the endless possibilities of modernizing medicine through technology, and the ability to learn artificial intelligence techniques to integrate into systems. Also, having worked on many collaborative projects in the university setting, I have a strong understanding of Object Oriented Programming, and the software lifecycle process as a whole. In addition to my software engineering involvement, I'm also very open to learning more skills in the software engineering especially creating stronger security for systems, and how we can use artificial intelligence to better excel technology especially in the aerospace industry. Additionally, having studied abroad in New Zealand for software engineering, I interacted with a very diverse population, and I feel it has given me the ability to be open and supportive of all staff members and quickly adapt to new environments. My goal in becoming Software Developer is to learn and grow as a software engineer, and to bring innovative ideas to Lockheed Martin. In closing, I am thrilled at the possibility of being involved with your software team, and would love the opportunity to meet with you and discuss the value that I can bring to your team. I appreciate your consideration and look forward to hearing from you.

Sincerely,
Madison Pahl
